🌐 neeleshio.cloud

Experienced (~3 years) Frontend Development Engineer with a demonstrated history in building scalable Web applications. Skilled in Prominent Techs such as Javascript, ReactJs, NextJs, NodeJs, Typescript, RESTFul, Redux. I have not limited myself just to Frontend, I have a track record of building and handling APIs, Databases, Cloud Platforms etc.

WORK EXPERIENCES

CampK12 | SDE-I Frontend
Dec 2021 - Jun 2023

Managing and maintaining company's 2 websites and 2 dashboards along with building new UI requirements.

- Migrated pages built with ReactJs to NextJs, this helped in serving the pages faster with better SEO support.
- Designed & built, both UI and custom APIs for an internal stats page to visualize set of user engagement data with the help of charts and query tables.
- Worked alongside 2 peers to build a student dashboard where students/users explore community projects, manage their own AR/VR projects, profile and earned rewards.
- Integrated product analytics tools like Amplitude and Google Analytics across all our websites to track user behaviour and interactions.
- Conducted routine updates, security patches, and other website maintenance tasks, which reduced technical dept and helped in achieving optimal website performance.

PiChain Labs | Frontend Engineer
Nov 2020 - Nov 2021

Managed overall Frontend development and maintenance of company's 2 main products eSign and eStamp.

- eSign & eStamp products helped the company to acquire 6+ clients and the company grew by 300% in just 6 months.
- Integrated end-to-end PDF solution library PSPDFKit with major customizations as per company need.
- Identified and fixed front-end issues, related to error handling and responsive layouts which increased mobile traffic by 50%.
- Revamped input validations of complex forms like stepper forms without using any 3rd party packages like formik.

FrontRow | Software Developer Intern
Apr 2020 - Sep 2020

As an Intern, got hands-on experience working across lot of technologies from frontend to backend.

- Designed and developed an analytics dashboard with ReactJs and ChartJs for 500+ social media groups data.
- Worked on microservice architecture for back-end and involved in 10+ APIs development.
- Designed and developed app notification trigger APIs and worked on their deployment on GCP.
- Integrated, maintained and monitored databases such as PostgreSQL and MongoDB.

PROJECTS

JsGPT - ChatGPT for Javascript 🔗

AI powered Q&A knowledgeBot webapp. The unique thing about this bot is you can use your own custom txt documents to query them.

Stand Up Now - Break Reminder 🔗

A Progressive Webapp (PWA) built with ReactJs which reminds you to stand up & take a break from your desk.

SKILLS

Technical

JavaScript / TypeScript

ReactJs

NextJs

NodeJs

Redux

RestFul

MongoDB

GIT & AWS

Professional

Self starter with level of commitment & drive.

Team player knack, can pitch-in whenever the team needs help.

Fanatic about writing quality and scalable code.

Can adapt to change without losing momentum.

A bug hunter.

EDUCATION

Bachelor of Engineering

Adichunchanagairi Instaitute of Technology
2015 - 2019

Fellowship in Web development

NovaSemita (Stoa)
2019 - 2020
